Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Risk Management is not new and most companies have probably been exercising very thorough diligence in this discipline for some time. Unfortunately, many companies fail to report and record this accurately for third part inspection, whether by stakeholders, creditors or regulators. This main issue with a lot of small and medium sized enterprises is due to the fact that most of them were set up initially as entrepreneurial ventures. As such much of the risk management and decision making generally was conducted on the hoof and there was little recording of the issues, action plans or remedial actions applied. As time goes by, normal practice or process is often adopted, carried out but seldom adequately recorded. There is also generally a lack of a clear audit or paper trail and in some cases no clear evidence of any Management Information (MI). BRAMS will provide this for you as well as a defined and comprehensive list of your processes and controls within them, so that anyone could identify what, where, who, how, when and why decisions were made and what impact those decisions had, being measured, managed and recorded on an ongoing basis, without the need for expensive software or hardware, analysts or consultants to interpret the results. Once established properly, the system will show you how to monitor your risks, identify risk hotspots, observe the impact of crystallising risks and follow through the process with mitigation controls and an assessment of their effectiveness. Sample templates are provided for you to customise and edit as required, depending upon your business, industry and local laws or requirements. BRAMS is a Risk Management System for Small Medium Sized Enterprises Using Typical...
