RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 100 pages. Original publisher: Golden, Colo. : National Renewable Energy Laboratory, 2005 OCLC Number: (OCOLOC)62868879 Subject: Renewable energy sources -- United States -- Marketing. Excerpt: . . . offerings. This is particularly true when REC products are supplied from renewable sources located in the same region in which they are marketed. Products and Pricing The green power products offered in competitive markets tend to differ from those offered by utilities in regulated markets, in that they may contain a mix of electricity generated from new and preexisting renewable energy projects; whereas utility green pricing programs generally utilize only new renewable energy supplies. One reason for this is that competitive suppliers are more concerned about price competition, and existing resources are typically available at lower costs. Also, when markets initially opened to competition, green power marketers often were forced to offer existing renewables because of a lack of new renewable energy supplies. However, as new renewable energy facilities have come online, the fraction of new renewables in retail products has increased. In addition, certification programs have required increasing amounts of new renewables. Going forward, the Green-e certification program has proposed changes to its certification standards that would require all certified products to be supplied 10 exclusively from new renewable energy projects. The U. S. Environmental Protection Agency's Green Power Partnership has proposed a similar change to its program requirements for green 11 power purchasers. Competitively marketed green power products generally carry a price premium of between 1 kWh and 2.5 kWh, although offerings range from no premium to 5 kWh. The price premium charged depends on several factors such as the price of standard offer or default service, the availability of incentives to green power marketers or suppliers,...
