## LOW-CARBON ENERGY SECURITY FROM A EUROPEAN PERSPECTIVE (PAPERBACK)

[DOWNLOAD](#)

Elsevier Science Publishing Co Inc, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book. Low-Carbon Energy Security from a European Perspective draws on the European Commission s funded project MILESECURE-2050. It considers low-carbon energy security and energy geopolitics in Europe, with a focus on four thematic clusters: challenging the energy security paradigm; climate change and energy security objectives (the components of a secure and low-carbon energy system); energy security in a geopolitical perspective, as it relates to economics, resource competition, and availability; and the influence of large scale renewable energy projects on energy security and shifting geopolitical alliances. An overarching narrative is that optimizing the energy system simultaneously across different objectives may be impossible, i.e., lowest cost, least environmental impact, minimal downtime, regional supply. This book explores these charged topics through insights from a series of novel, new energy project case studies, and demonstrates the need for difficult political conversations within Europe and beyond by posing fundamental yet new questions about the energy security paradigm. \* Offers a unique perspective on low-carbon energy security by considering the assumptions behind current energy security needs\* Suggests the benefit of envisioning energy security through out-of-the-box scenario development with respect to the energy system\* Includes energy in an international scenario with case studies from Africa, Russia, Ukraine, Morocco, China, South America, and Europe\* Draws on the European Commission s funded project MILESECURE-2050.
